### Project Management Stream

#### Mastering Project Management: The Full Lifecycle

Monday June 22, 2009 (9h00—12h00)

Good project management can make the difference between success and failure. This common sense practical workshop will introduce participants to the 5 phases of the project management lifecycle from Initiation to Closure. Come learn how to balance costs and schedules while guiding your projects to success.

#### Mastering Project Management: The Project Plan

Monday June 22, 2009 (13h00—16h00)

Today's projects are subject to intense pressure. Project managers must manage their projects while respecting timelines and budgets. The ability to guide a project and lead the members of the project team is highly dependent on the quality and completeness of the project plan. Come learn how to create a project plan that is both efficient and flexible by attending this exciting 3 hour hands on workshop.

#### Mastering Project Management: The Art of Scheduling

Tuesday June 23, 2009 (9h00—12h00)

Whether it is due to unforeseen events or uncontrollable changes in the operating environment, keeping a project on schedule is more of an art than a science. Come learn about the intricacies of optimistic versus pessimistic time estimation and how to use them in establishing the project's critical path.

### Project Management Stream

#### Mastering Project Management: The Art of Cost Control

Tuesday, June 23, 2009 (13h00—16h00)

Estimating the costs associated with a project is a tricky thing. In doing the calculations, we must ensure that we factor in both tangible and intangible costs. We must also remember to include administrative costs as well as costs related to missed deadlines or absent resources. Come learn how to balance cost effectiveness with high performance in this dynamic, hands-on workshop.

#### Mastering Project Management: The Art of Risk Analysis

Wednesday, June 24, 2009 (9h00—12h00)

When it comes right down to it, none of us want to consider the possibility that we will lose our senior architect in the middle of a project. We certainly do not want to factor in loss of funding or long delays into our project plan. But the fact of the matter is that we have to. Good project managers know the risks. They understand the overall impact of those risks on their project should they occur and have contingency plans at the ready. Come learn the art of risk analysis in this practical workshop for project professionals.

#### Mastering Project Management: Work Breakdown Structure

Wednesday, June 24, 2009 (13h00—16h00)

Large projects succeed because the essential components of the project have been clearly identified and pro-actively managed. Effective project management requires the creation of a comprehensive and well-defined work breakdown structure which clearly identifies the constituent parts. Come learn how to research and create a work breakdown structure that will ensure project success.

### PM, Agile, ITIL V3 Stream

#### Mastering Project Management: Applying Principles to Practice

Thursday, June 25, 2009 (9h00—16h00)

Applying sound project management principles in the real world takes practice. In this full day workshop, participants will be given the opportunity to actually use the principles of project planning, scheduling, risk analysis and cost control in the context of a real world project. Practice makes perfect, and in the case of project management, perfection leads to projects delivered on time and on budget.

#### Mastering Agile Development: Applying Principles to Practice

Thursday, June 25, 2009 (9h00—16h00)

The success or failure of software development projects is more often determined by the quality of the underlying project methodology than anything else. Modern IT projects require a dynamic and flexible methodology that allows the project deliverables to be adjusted as the project matures. This essential workshop will allow participants to understand the true nature of the popular Agile development methodology and to apply it in a real world scenario.

#### Mastering ITIL V3: Applying Principles to Practice

Friday, June 26, 2009 (9h00—16h00)

Whether you are the manager of an IT project or the manager of a project delivering widgets, the foundation concepts upon which ITIL is based can help you facilitate a culture of excellence and efficiency with respect to service delivery. All project managers want to deliver services that their customers want. Come learn to apply the principles of ITIL service management to real world projects.
